S. Congress by the Constitution are reserved for the states or the people."

And also adding the following addition to the Be It Resolved section of the Resolution:

RESOLUTION 2020-06  
RESOLUTION IN SUPPORT OF RECOMMENDED 911 FEE & SJR 836

Whereas, in accord with state law, the Tennessee Emergency Communications Board ("TECB") held a public hearing and proposed an increase of the 911 monthly fee to \$1.50 per line, for the life-saving service, which change is subject to approval by the State House and Senate by Joint Resolution (Senate Joint Resolution 836); and

Whereas, the current fee is set at \$1.16 statewide for all devices capable of calling 911, with two cents (\$0.02) reserved to fund the Telecommunications Devices Access Program, which provides devices to the speech or hearing-impaired, and will remain in place with the proposed increase; and

Whereas, the additional revenue is needed to meet increased operational costs of the Emergency Communications District, which is funded, in part, by this government;

Now, therefore, be it resolved by the Bradley County Legislative Body meeting in regular session at Cleveland, Tennessee, on this 18<sup>th</sup> day of February, 2020, that we do hereby express support of the 911 fee change, and SJR 836, which would implement the recommended monthly fee by the TECB, effective July 1, and further,

Be it further resolved that we direct that a copy of this resolution be promptly forwarded to the elected state representatives with legislative districts that include this jurisdiction.

ADOPTED this 18<sup>th</sup> day of February, 2020.

**P R O P O S A L**

**OF THE DEPARTMENT OF TRANSPORTATION OF THE STATE OF TENNESSEE  
TO THE COUNTY OF BRADLEY COUNTY, TENNESSEE;**

The DEPARTMENT OF TRANSPORTATION of the State of Tennessee, hereinafter "DEPARTMENT", proposes to construct a project in the County of Bradley, Tennessee, hereinafter "COUNTY", designated as Federal Project No. NH-60(13), State Project No. 06009-2218-14, that is described as "SR 60 FROM 4 LANE NORTH OF I-75 (WESTLAKE DR) TO SR 306", provided the COUNTY agrees to cooperate with the DEPARTMENT as set forth in this proposal, so that the general highway program may be carried out in accordance with the intent of the General Assembly of the State.

Accordingly, the parties agree as follows:

1. That in the event any civil actions in inverse condemnation or for damages are instituted by reason of the DEPARTMENT, or its contractor, going upon the highway right-of-way and easements, and constructing said project in accordance with the plans and as necessary to make the completed project functional, it will notify in writing the Attorney General of the State, whose address is 425 Fifth Avenue North, Nashville, Tennessee, 37243, of the institution of each civil action, the complaint and all subsequent pleadings, within ten (10) days after the service of each of the same, under penalty of defending such actions and paying any judgments which result therefrom at its own expense.
2. The COUNTY will close or otherwise modify any of its roads or other public ways if indicated on the project plans, as provided by law.
3. The COUNTY will transfer or cause to be transferred to the DEPARTMENT, without cost to the DEPARTMENT, all land owned by the COUNTY or by any of its instrumentalities as

required for right-of-way or easement purposes, provided such land is being used or dedicated for road or other public way purposes.

4. Where privately, publicly or cooperatively owned utility lines, facilities and systems for producing, transmitting or distributing communications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, and other similar commodities, including publicly owned facilities such as fire and police signal systems and street lighting systems are located within the right-of-way of any road or other public way owned by the COUNTY, or any of its instrumentalities, the COUNTY agrees that it will take any action necessary to require the removal or adjustment of any of the above-described facilities as would conflict with the construction of the project. But the foregoing may not be a duty of the COUNTY since it shall become operative only after the DEPARTMENT has been unsuccessful in its efforts to provide for said removals or adjustments for the benefit of the COUNTY.

The foregoing does not apply to those utility facilities which are owned by the COUNTY or one of its instrumentalities, it being understood that the COUNTY has the duty to relocate or adjust such facilities, if required, provided the COUNTY is notified to do so by the DEPARTMENT with detailed advice as to this duty of the COUNTY.

5. The COUNTY will maintain any frontage road to be constructed as part of the project;  
6. After the project is completed and open to traffic, the COUNTY will accept jurisdiction and maintenance such parts of any existing DEPARTMENT highway to be replaced by the project, as shown on the attached map.

7. The COUNTY will make no changes or alter any segment of a road on its road system that lies within the limits of the right-of-way acquired for any interchange to be constructed as part of the project and will not permit the installation or relocation of any utility

facilities within the right-of-way of any such a segment of one of its roads without first obtaining the approval of the DEPARTMENT.

8. No provision hereof shall be construed as changing the maintenance responsibility of the COUNTY for such part of the project as may presently be on its highway, street, road or bridge system.

9. It is understood and agreed between the DEPARTMENT and the COUNTY that all traffic control signs for the control of traffic on a street under the jurisdiction of the COUNTY and located within the DEPARTMENT's right-of-way shall be maintained and replaced by the COUNTY.

10. When traffic control devices for the direction or warning of traffic, lighting of roadways or signing, or any of them, which are operated or function by the use of electric current are constructed or installed as part of the project, they will be furnished with electricity and maintained by the COUNTY.

11. If, as a result of acquisition and use of right-of-way for the project, any building and/or structure improvements become in violation of a COUNTY setback line or building and/or structure requirement, including, but not limited to, on-premise signs, the COUNTY agrees to waive enforcement of the COUNTY setback line or building and/or structure requirement and take other proper governmental action as necessary to accomplish such waiver.

12. If, as a result of acquisition and use of right-of-way for the project, any real property retained by any property owner shall become in violation of a COUNTY zoning regulation or requirement, the COUNTY agrees to waive enforcement of the COUNTY zoning regulation or requirement and take other proper governmental action as necessary to accomplish such waiver.

13. The COUNTY will not authorize encroachments of any kind upon the right-of-way, nor will the COUNTY authorize use of the easements for the project in any manner which affects

the DEPARTMENT's use thereof.

14. The COUNTY will obtain the approval of the DEPARTMENT before authorizing parking on the right-of-way and easements for the project.

15 The COUNTY will not install or maintain any device for the purpose of regulating the movement of traffic on the roadway except as warranted and in conformity with the Manual on Uniform Traffic Control Devices.

16. If the project is classified as full access control (i.e. a project which has no intersecting streets at grade), then the DEPARTMENT will maintain the completed project. If the project is not classified as full access control, then the DEPARTMENT will maintain the pavement from curb to curb where curbs exist, or will maintain full width of the roadway where no curb exist. The COUNTY agrees to maintain all other parts of non-access control projects; provided, however, that any retaining walls, box culverts, or other like structures constructed as part of the project that supports the structural integrity or stability of the roadway surface shall be maintained by the DEPARTMENT.

17. If a sidewalk is constructed as a component of this project, the COUNTY shall be responsible for maintenance of the sidewalk and shall assume all liability for third-party claims for damages arising from its use of the sidewalk or premises beyond the DEPARTMENT'S maintenance responsibilities as set forth in section 16 of this proposal.

18. When said project is completed, the COUNTY thereafter will not permit any additional median crossovers, the cutting of the pavement, curbs, gutters and sidewalks, by any person, firm, corporation, or governmental agency, without first obtaining the approval of the DEPARTMENT.

19. The DEPARTMENT will acquire the right-of-way and easements, construct the project and defend any inverse condemnation for damage or civil actions of which the Attorney

General has received the notice and pleadings provided for herein; provided, however, that if the project is being constructed pursuant to a contract administered by the DEPARTMENT's Local Programs Development Office, the terms of that contract shall control in the event of a conflict with this proposal.

20. The project plans hereinbefore identified by number and description are incorporated herein by reference and shall be considered a part of this proposal, including any revisions or amendments thereto, provided a copy of each is furnished the COUNTY.

21. The acceptance of this proposal shall be evidenced by the passage of a resolution or by other proper governmental action, which shall incorporate this proposal verbatim or make reference thereto.

IN WITNESS WHEREOF, the DEPARTMENT has caused this proposal to be executed by its duly authorized official on this the \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_.

**Master Plan for Water and Sewer Services**

**1. GENERAL INFORMATION**

Bradley County, Tennessee is soliciting qualifications from qualified engineering firms for the preparation of a water and sewer master plan.

Bradley County, Tennessee is a county in southeast Tennessee with an interstate and several major highway corridors together with a major river corridor. As such, Bradley County is poised for residential, commercial, and industrial development. However, this development is conditional upon providing the necessary infrastructure to support such growth, particularly water and sewer services.

There are currently four providers of public water services within Bradley County, which include Cleveland Utilities, Eastside Utility District, Ocoee Utility District, and Savannah Valley Utility District. In addition, there are two providers of public sewer services, Cleveland Utilities and Ocoee Utility District. Unfortunately, there are areas of Bradley County that remain unserved, or inadequately served, especially with respect to sewer services. A Bradley County waterline map is attached as Exhibit #1. Information regarding current sewer services will need to be obtained from the utilities or other sources.

There have been prior planning efforts, though not necessarily focused on water and sewer utilities. These have included the following:

- BCC 2035 Joint Strategic Plan, 2010 (including Bradley County, City of Cleveland, City of Charleston, and Chamber of Commerce).
- Bradley County Comprehensive Plan, 2013.
- Southern Corridor Area Plan, 2013.
- Northern Corridor Area Plan, 2013.
- Central City Area Plan, 2013.

Bradley County would benefit from a master plan specifically addressing water and sewer utilities that would assess the current situation, consider existing constraints (jurisdictional and operational), project future needs, and devise a coordinated, phased plan for best providing those needed services.

**2. SCOPE OF SERVICES**

**Task 1 – Background Information**

Meet with representatives of Bradley County to clarify goals for water and sewer services to the entire County, identify constraints, outline overall priorities, and establish the planning period.

Meet with and obtain reasonably ascertainable information on existing water and sewer systems serving Bradley County, including Cleveland Utilities, Calhoun-Charleston Utility District, Ocoee Utility District, Savannah Valley Utility District, and Eastside Utility District. Information shall include extent of service areas, approximate number of customers in Bradley County, source(s) of water and storage and treatment facilities (for water systems), availability of fire protection (hydrants and fire flows), and pumping and treatment facilities, including decentralized systems and recycled/reclaimed water systems (for sewer systems).

Obtain and review previous planning documents, including facilities planning documents, prepared by or for Bradley County or Cleveland Utilities. Consult with the Bradley County Planning Commission, the State of Tennessee, and the UT Center for Business and Economic Research, as appropriate, to update population growth projections contained in the planning documents. Take into account high, low and mid-range projections, where available.

Review available land use information and planning, including transportation corridors, major residential developments, and existing and proposed business/industrial parks.

Identify portions of the County known to contain limitations to future development due to environmental constraints, such as steep topography, flood zones, poorly percolating soils (i.e., unsuitability for septic systems), wellhead protection zones, natural areas, or national or state forest lands.

Contact local field representatives of TDEC Division of Water Resources for information on areas of chronic, failing septic or decentralized systems in the County that might present a threat to public health or the environment.

Inventory major stream watersheds in the County, and obtain general information on major included streams with respect to water quality (i.e., impairment or failure to meet water quality criteria) and Exceptional Tennessee Waters classification.

### **Task 2 – Public Participation**

Having compiled the information in Task 1 above, conduct a publically advertised public information meeting at an appropriate venue in the County for the purposes of obtaining public input on perceived needs for water and sewer service. Invite stakeholder groups, such as realtors, developers, utilities, regulators (TDEC), and local environmental advocacy organizations. Set up a site on social media (such as Facebook) to summarize the goals and priorities of the planning effort, provide relevant public information, and solicit constructive feedback. At the conclusion of the alternative analysis, the County may elect to convene another public information meeting.

### **Task 3 – Needs Assessment**

Based on the information compiled in Task 1 above, identify those unincorporated areas of the County that are unserved or underserved with respect to availability of adequate water and/or sewer services to achieve the goals and priorities set by the County. It is anticipated that three to five areas or corridors within the County will be identified for further study and planning.

In each of the unserved or underserved areas selected for further study, quantify the needs in terms of estimated and projected numbers of customers and water demands and/or wastewater flows, as

applicable, over the planning period. Where appropriate, evaluate sensitivity of demand and flow projections to high range and low range growth projections for the areas.

#### **Task 4 – Alternative Analysis**

Identify feasible alternatives for providing needed water and/or sewer services in each of the selected study areas. For water, the anticipated alternatives would primarily involve line extensions or upgrades from nearby existing water utilities. For sewer, the alternatives may include collection and pumping to a nearby existing sewer system (where available), treatment and reuse or reclamation, or treatment and discharge to a stream or to a land disposal system (drip or spray, depending on size). It is not the intent of this step to require development of computerized hydraulic models of the improvements, although it is not prohibited, where useful in sizing proposed lines and facilities. The extent of sizing would probably be limited to the major backbone or skeletal portions of the proposed alternative. It is not the intent of this task to require development of multiple alternatives in all cases where one solution is intuitively obvious, or other alternatives are simply not feasible. In some areas, the approach may need to be phased, depending on need.

Develop estimated costs of the proposed facilities in the alternatives, and evaluate and compare alternatives with respect to factors such as cost, reliability, implementation, environmental effects, jurisdictional or permitting challenges, or any other factors. The evaluation may be in the form of a ranking or other suitable comparison. Cost estimates would understandably be at a conceptual level, with appropriate and customary contingencies and allowances.

#### **Task 5 – Description of Recommended Plan**

Describe the recommended alternatives, including estimated costs and phasing, if applicable. Using the recommended plans, develop a suggested Capital Improvements Program that covers the selected study areas.

For each study area, identify requirements for implementation, including engineering, permitting, and easements or property acquisition. For those alternatives involving existing utilities, identify any interjurisdictional agreements that may be required. Where existing utilities are unwilling or unable to assume ownership and/or operation of the proposed facilities, explore other institutional organizations (such as a water and sewer authority) or private companies that could own and/or operate the proposed facilities.

Briefly survey potential funding sources for the capital improvements, which may include capital or in-kind contributions from participants or partners, along with an assessment of the advantages and disadvantages of each.

Any recommendations should utilize readily available materials and construction methods, not proprietary devices or designs.

#### **Task 6 – Master Plan Report**

Prepare a written summary report of the information, needs assessment, alternatives analyses, recommendations, and Capital Improvements Program. Submit ten (10) hardbound copies (plus one electronic copy) of the draft report to County and present the draft report to both the Drinking

and Waste Water Treatment Services Ad Hoc Committee and the full Bradley County Commission. Following receipt of comments and feedback from the County, finalize the report and deliver Submit ten (10) hardbound copies (plus one electronic copy) of the report. Include an executive summary in the final report. Any master plan maps must be provided in one of the following formats: .dwg, .dxf or .shp.

### 3. INVITATION AND SUBMISSION
